

Why LPMS? It's the most powerful incident management tool on the market.

Thieves and dishonest employees are taking your profits right out your front door. They're becoming bolder and sneakier and their crimes aren't petty.

Inventory shrink is still rising and costs the U.S. retail economy \$45 billion a year. This trend will force companies to make hard financial and personnel decisions, some may be forced to go out of business altogether.

That's why LP Software, the industry leader in global incident and audit management, is committed to giving you every tool possible to fight back. We are designing, inventing, and innovating new products to make it easier for you to collect data, analyze trends, and make immediate improvements. Our products capitalize on the latest technology so you can access information offline, out of the office and on the road.

LP Software allows you to convert all your data into beautiful, actionable reports you can view on any device. Our Loss Prevention Management System (LPMS) is a **powerful data analytic tool** that has handled more than 15 million incident cases. It allows you to easily manage any type of incident, from theft to accidents, while letting you customize your reports with dynamic dashboards to help tell the story.

The forward-thinking technologies lets you to **get the most out of your data** while freeing up your IT team-leaving you more time to concentrate on managing your department and improving efficiencies. Built on the AWS Amazon cloud, whose datacenter and network architecture is built to meet the most demanding requirements, our state-of-the-art security is built into every product.

With input from our clients, we are constantly evolving our software to bring you the most flexible, feature-rich products in the industry.

Service isn't an afterthought either. When you have a question, LP Software provides live technical and customer support that is second to none.
