

Incident, case and data management

APIS

Retail's leading workflow, management and investigation tool

- ▶ Customizable dashboards, forms and reporting
- ▶ Supports 10 to over 90,000 locations
- ▶ Robust security offers 99+ levels of authorization
- ▶ Integrates with civil recovery providers
- ▶ Supports TPA claims management systems
- ▶ Modular functionality scales to meet unique needs

APIS (Asset Protection Information System) is a leading software solution for Loss Prevention and Risk Management professionals. Beyond simple Case Management, **APIS** contains powerful utilities to collect, analyze, report, and collaborate on critical incident and case data. **APIS** allow you to track and alert on topics such as crimes, accidents, and safety events, as well as brand protection issues such as counterfeiting and patent infringement.

By combining years of experience in Law Enforcement, Investigations and Loss Prevention, Appriss Retail has developed this powerful communication, workflow, management and investigative tool to empower your team to positively impact your company's bottom line.

Optimized for your "desktop and mobile" devices.

Impact shortage and profit performance with custom and efficient data collection

Flexible audit forms, analysis and reporting

- ▶ Perform online audits, analysis and reporting
- ▶ Assign audits to specific store and user groups
- ▶ Provide immediate feedback and customized action plans
- ▶ Immediately identify systemic issues
- ▶ Compare against historical performance
- ▶ Measure for corporate compliance
- ▶ Create and save survey templates

APISaudit allows retailers to create custom audit forms and reports and provides the flexibility needed to create unique strategies that compliment your corporate culture. Audits can be performed quickly combining the process of data collection, data entry, and report preparation. As data is entered it becomes immediately available for reporting and analysis.

Use **APISaudit** across your enterprise to incorporate departmental programs, including those from operations, merchandising, risk management and others. Use the system to implement efficient and flexible input and data collection models to directly impact shortage related to crime or operational deficiencies as well as to improve profit performance.
